Subject: AMD - modeling question
Attachments: Focused FS, former 901_902 Thompson Pl, Sunnyvale, w_apps A-E.pdf

Hi Michael,

Hope you are doing well - It was nice meeting you out in the field last week!

I'm reaching out today because I am looking for nearby CERCLA sites to Lorentz Barrel and Drum that have historical modeling data or reports with documented organic carbon (Koc) or Kd values, and Herb Levine mentioned your site AMD in Sunnyvale. Our contractor is modeling COC distribution in groundwater at Lorentz and this information might help them to refine the Kd input in their model and narrow down our current range of modeling scenarios.

I have attached a FFS report that I found in SEMS from AMD (after a quick search for Koc) that I'm wondering if you might be able to tell me more about, or whether this is the best information for me to pass along to my contractor (if that is okay)? Please let me know.

Thank you!

Kelsey Bartling
